

AHMAD RAFLI FIRMAN ROSYADI

081334185032 | ahmadrapli70@gmail.com

Sultan Agung Street No:25, Kepanjen, Malang, Jawa Timur

FRONTEND ENGINEER | REACT.JS | DATABASE & IT INFRASTRUCTURE

Frontend Engineer with a strong background in database administration, IT infrastructure, and software engineering. Experienced in building responsive web interfaces using HTML, CSS, and React.js, supported by strong knowledge of databases, APIs, system integration, Linux, and application monitoring. Comfortable collaborating with cross-functional teams and troubleshooting applications from both frontend and infrastructure perspectives.

Work Experience

PT. Neural Technologies Indonesia

May 2023-May 2026

Database Administrator

- Manage and maintain various databases to ensure optimal performance, availability, and security.
- Perform regular database backups, recovery procedures, and disaster recovery planning.
- Monitor and optimize database performance, including queries and indexing, to improve data retrieval times.
- Implement and manage data security measures to protect sensitive information and ensure compliance with data protection regulations.
- Collaborate with developers and IT teams to design and deploy scalable database solutions for new applications.
- Conduct database migrations and upgrades with minimal downtime and service disruptions.
- Develop and implement automation scripts for database maintenance tasks.
- Create procedures to kill unwanted or disruptive database connections.
- Schedule automatic log retention for databases to efficiently manage storage.
- Perform tuning and troubleshooting to identify and resolve database errors.

PT. Solusi 247

May 2020-May 2023

Business Officer (Support Developer)

- In here I do daily activities to check memory capacity in HIVE&Hadoop
- Manage Database
- Import Database to give an user TSEL
- DDL & DML Database
- Do complain handling DIGIPOS where this application is a Telkomsel package sales merchant application
- SQL Developer for database, monitoring, and provide data.
- Grafana and ITOC for monitoring success rate application. Designed and implemented scalable applications for data extraction and analysis.
- Do complain handling LACIMA where this application is Ordering System that handle postpaid subscriber such asPSB, AddRemove Offer, block unblock, termination, reestablish, changeownership, replace price plan
- Application used for corporate customers, SME, Dealers, Outlets and Non-Telecommunication Dealers to purchase data in bulk (data package list), telephone packages, pulses, BPJS and electricity pulses which can be resold to other customers Module: SME OnlineModule

PT. Telekomunikasi Indonesia

July 2020 - September 2020

Administrative Staff Intern, Pasuruan, Indonesia

- Monitored Optical Distribution Points (ODP): Conducted regular inspections and maintenance of ODP infrastructure to ensure optimal network connectivity and performance.
- Resolved Internet Service Issues: Provided on-site technical support at customers' homes, troubleshooting and repairing internet connectivity problems to restore service promptly.
- Prepared and Submitted Activity Reports: Documented daily tasks, service activities, and issue resolutions, ensuring accurate and timely reporting to supervisors for operational tracking and decision-making.
- Coordinated with Technical Teams: Collaborated with field technicians and network engineers to address complex service disruptions and ensure seamless resolution of technical issues.
- Conducted Customer Follow-Ups: Engaged with customers post-service to confirm resolution satisfaction and gathered feedback to improve service quality and customer experience.

Education

BACHELOR DEGREE BINA NUSANTARA UNIVERSITY

April 2021 - Aug 2025

Information System

- Studying core subjects such as system analysis and design, database management, and enterprise architecture.
- Engaged in real-world case-based projects that emphasize digital problem solving and innovation.
- Developing technical skills in programming, data analysis, IT project management, and UI/UX design.
- Gaining a strong understanding of digital transformation and data-driven decision-making.
- Enhancing communication and collaboration skills through teamwork in interdisciplinary projects.
- Experienced with tools and platforms such as ERP systems, business intelligence tools, and software development environments.
- Actively participating in academic and non-academic activities to build soft skills and leadership qualities.

SMK TELKOM MALANG, Malang

July 2017 - July 2020

Software Engineering

- Developed Resilience Under Pressure: Cultivated a strong mindset to handle challenging situations through rigorous training and a demanding academic environment, fostering adaptability and perseverance.
- Mastered Foundational Technology Concepts: Gained a comprehensive understanding of software engineering principles, building a solid foundation in technology and its applications.
- Acquired Proficiency in Programming Languages: Learned and applied various programming languages, including HTML, CSS, Shell Script, SQL, and Java, through hands-on projects and coursework.
- Explored Networking Fundamentals: Studied routing concepts, developing an understanding of network configurations and their role in ensuring efficient data communication.
- Engaged in Practical Learning: Participated in real-world projects and simulations that enhanced problem-solving skills and prepared for professional challenges in software engineering.

Soft Skills, Hard Skills, Language

Soft Skills :

- **Leadership :** The ability to guide, motivate, and inspire a team to achieve common goals. Involves taking initiative, making decisions, and fostering a collaborative environment.
- **Communication :** The skill of conveying information clearly and effectively, both verbally and in writing, while actively listening to others. Ensures mutual understanding in professional interactions.
- **Analytical Thinking :** The capacity to break down complex problems, evaluate data, and identify patterns or solutions logically. Involves critical thinking and attention to key details.
- **Problem-Solving :** The ability to identify challenges, assess options, and implement effective solutions under pressure. Focuses on resolving issues efficiently and creatively.
- **Attention to Detail :** A focus on accuracy and thoroughness in tasks, ensuring high-quality outcomes by catching errors or inconsistencies.
- **Teamwork :** The ability to collaborate effectively with others, valuing diverse perspectives and contributing to collective success. Involves compromise and mutual support.
- **Creative Thinking :** The ability to generate innovative ideas and approaches to solve problems or improve processes. Involves thinking outside the box and adapting to new challenges.
- **Adaptability :** The flexibility to adjust to changing situations, new requirements, or dynamic work environments. Involves resilience and the ability to learn quickly.

Hard Skills :

- Frontend Development: React.js, HTML5, CSS3 — Component-based development, responsive UI implementation, and frontend development.
- Programming & Scripting: PHP, Shell Script — Application scripting, automation, and task optimization.
- Database: PostgreSQL, MySQL, Oracle, SQL Server — SQL development, database management, troubleshooting, and performance monitoring.
- Database Tools: SQL Developer, pgAdmin, DBeaver, CloudBeaver — Query execution, database administration, data analysis, and troubleshooting.
- Cloud & Infrastructure: AWS, Linux, Ubuntu — Cloud fundamentals, server administration, system configuration, monitoring, and troubleshooting.
- Big Data: Hadoop, Hive — Data processing, big data management, monitoring, and troubleshooting.
- Monitoring & Observability: Grafana, Prometheus, Dynatrace — Infrastructure monitoring, performance analysis, dashboard management, and alerting.
- Messaging: RabbitMQ — Message queue management, monitoring, and troubleshooting.
- Project Management: JIRA — Task management, issue tracking, project coordination, and workflow management.
- Productivity: Microsoft Office — Documentation, data processing, reporting, and presentation.

Language :

- Indonesian (Native)
- English (Intermediate)

SELECTED FRONTEND PROJECTS

Personal Portfolio Website

React.js | HTML5 | CSS3 | Responsive Design

- Developed a responsive personal portfolio website to showcase professional experience, technical skills, and projects.
- Built reusable and component-based UI using React.js.
- Implemented responsive layouts optimized for desktop, tablet, and mobile devices.
- Designed interactive sections including About, Skills, Experience, Projects, and Contact.
- Focused on clean UI, usability, and consistent user experience across screen sizes.

Url: <https://ahmadrafi-porto.vercel.app/>

Naikin Studio — Business Landing Page

Frontend Web Development | HTML, CSS, JavaScript

- Designed and developed a responsive business landing page for Naikin Studio, a digital design service platform for UMKM.
- Implemented responsive UI using HTML5 and CSS3, focusing on clean layouts, typography, spacing, and mobile-friendly design.
- Developed interactive features using JavaScript, including navigation, package/service details, portfolio preview, FAQ interactions, and dynamic WhatsApp order links.
- Built structured sections for services, pricing packages, portfolio, testimonials, workflow, FAQ, and contact information to improve user experience and conversion.
- Deployed the website using Netlify and optimized the interface for modern web browsers and responsive screen sizes.

Url: <https://naikin-studio.netlify.app/>

Klikin.id — Digital Marketing Agency Website

Frontend Web Development | HTML5, CSS3, JavaScript, Netlify

- Designed and developed a responsive business website for a digital marketing agency focused on

UMKM and local brands.

- Built responsive UI components and structured sections including services, pricing packages, company overview, workflow, and contact information.
- Implemented interactive navigation, CTA elements, and dynamic WhatsApp links to support customer inquiries and lead generation.
- Applied responsive design principles to provide a consistent user experience across desktop and mobile devices.
- Deployed and maintained the production website using Netlify.s.

PROJECTS

Neural Technologies Indonesia

May 2023-May 2026

IT Team Member - Database Specialist

- Managed Server Operations and Troubleshooting: Diagnosed and resolved connectivity issues by restarting Windows servers and performing system optimizations to ensure reliable performance.
- Configured System Integrations: Implemented timezone settings, NTP configurations, and SSH key setups for secure inter-server communication within clustered environments.
- Deployed and Configured Monitoring Tools: Set up and implemented NDM deployments on Grafana, integrating node exporters and configuring clustering for real-time server performance monitoring.
- Monitored and Reported Server Utilization: Performed daily checks on CPU, RAM, and disk utilization across NDM servers using Grafana, and maintained detailed task checklists, to ensure operational compliance
- Installed and configured Node Exporter on server to enable system metrics monitoring and Grafana dashboard integration for real-time performance tracking.
- Opened and managed root access permissions on clustered PostgreSQL environments to support inter-server communication and integration.
- Collaborated with system and database teams to ensure high availability, scalability, and performance of data exchange across multiple platforms.

Telkomsel (NDM Network Data Mart)

Mei 2023 - Current

Manage database NDM

- IT Team Member - Database SpecialistManage and coordinate Database Administrators (DBAs) involved in the Network Data Mart (NDM) project to ensure tasks are completed efficiently and in alignment with project goals.
- IT Team Member - Database SpecialistManage and coordinate Database Administrators (DBAs) involved in the Network Data Mart (NDM) project to ensure tasks are completed efficiently and in alignment with project goals.Oversee the implementation, maintenance, and optimization of network-related data systems to support business intelligence and decision-making processes.
- Collaborate with cross-functional teams, including IT, data engineering, and project stakeholders, to ensure smooth communication and timely project delivery.
- Monitor project progress, identify potential risks, and provide solutions to maintain workflow and meet deadlines.
- Performed Database Housekeeping and Backups: Executed retention and vacuum operations on PostgreSQL tables and conducted data backups to FTP servers, ensuring data integrity and availability.
- Automated Operational Processes: Developed scripts for auto-retention of PostgreSQL logs and automatic termination of idle database connections, improving database efficiency and reducing manual workload.
- Conducted Server Rebalancing and Commissioning: Executed rebalancing tasks on OSS2 servers, by creating main tables and partitions, and commissioned Ubuntu servers to support operational scalability.
- Installed, configured, and created TDS Foreign Data Wrapper (FDW) extension on OSS environment to integrate external MS SQL Server data sources.
- Implemented ClickHouse FDW extension on reporting server to enable direct queries and integration between PostgreSQL and ClickHouse databases.
- Configured TDS FDW, PostgreSQL FDW, and dblink extensions on internal reporting databases to facilitate secure, optimized cross-database operations.

Manage Operation Digipos - Lacima

- **Managed Operations for Multiple Applications:** Oversaw the operational activities of Digipos, Lacima, Digiport, and Ilmupedia applications, ensuring seamless functionality and user experience.
- **Administered Application Databases:** Maintained and managed databases for Digipos, Lacima, Digiport, and Ilmupedia, ensuring data integrity, accuracy, and accessibility for operational needs.
- **Coordinated Ongoing Activities:** Monitored and streamlined daily operational tasks, facilitating efficient workflows and timely execution of project objectives.
- **Prepared Activity Reports:** Compiled detailed reports based on operational activities, providing insights and updates to stakeholders to support decision-making and performance tracking.
